

## **Plant a tree :**

It is a proposition made to our visitors : to plant a tree for a very small price (2 or 3 euros according to the tree), and this tree will be « his or hers » at Inka Llacta®.

## **Why plant a tree ?**

There are various reasons :

- we know that there is a lot of pollution and that it is part of the global warming, but the trees have a real capacity of capturing CO2 and transforming it into oxygen. We know that our journey occurs with motorised transports, then we want to offer a compensation to our gas emissions : one tree equals 100 vehicles

**Then to fight against pollution, climate change, desertification and the loss of native biodiversity.**

The trees that can be planted are among others :

**Capuli  
Chachacomo  
Quishuar  
Queuña  
Tara  
Sauco  
Molle  
K'antu**

Etc.
