Plant a tree :

It is a proposition made to our visitors : to plant a tree for a very small price (2 or 3 euros according to the tree), and this tree will be « his or hers » at Inka Llacta®.

Why plant a tree ?

There are various reasons :

- we know that there is a lot of pollution and that it is part of the global warming, but the trees have a real capacity of capting CO2 and transforming it into oxygen. We know that our journey occur with motorised transports, then we want to offer a compensation to our gas emissions : one tree equals 100 vehicles

Then to fight against pollution, climate change, desertification and the loss of native biodiversity.

The trees that can be planted are among others :

Capuli
Chachacomo
Quishuar
Queuña
Tara
Sauco
Molle
K'antu

Etc.
